

YOOTEST BENZENE & HYDROCARBONS

Name of the pollutant	CAS No.	ESSENTIAL	INTEGRAL
Benzene	71-43-2	●	●
Naphthalene	91-20-3	●	●
Toluene	108-88-3		●
Xylenes (3 isomers: m-, o- &)	106-42-3 / 95-47-6 / 108-38-3		●
Ethylbenzene	100-41-4		●
1,2,4-Trimethylbenzene	95-63-6		●
n-Decane	124-18-5		●
n-Undecane	1120-21-4		●

YOOTEST allows you to test the quality of your indoor air with **great precision**. The selected pollutants are **measured in a laboratory** using state-of-the-art technologies to ensure that measurements are **below the international health reference values for the most dangerous air pollutants in indoor air**.

Two levels of analysis are available:

ESSENTIAL

The ESSENTIAL analysis level focuses on the **most hazardous chemicals**, classified as **high priority health concern** by the relevant international authorities, including WHO, US EPA, ANSES and HEALTH CANADA.

These pollutants are carcinogenic, neurotoxic and/or induce developmental problems.

It is important to avoid exposure to these highly toxic chemicals and only an accurate measurement of these pollutants in your indoor air can give you the right indication.

INTEGRAL

The INTEGRAL level analysis includes all ESSENTIAL level chemicals as well as an **extensive list of other pollutants that are common in indoor air and of health concern**.

All these chemicals are known to be **highly toxic** to humans and are **frequently found** during indoor air quality surveys.

The presence of these chemicals should be monitored, especially for pregnant women, children and people with heart and/or respiratory pathologies.
